Configure IE10 Compatibility View

When you use Talent|REWARD with Internet Explorer® 10 (IE10), you must configure the browser to display Talent|REWARD in Compatibility View. Although there are several ways to do this, to ensure that Talent|REWARD works correctly with IE10, follow the steps below.

**Note:** If you cannot perform these steps yourself, have your corporate IT department perform these steps system-wide to implement this change uniformly for all users.

1. In IE10, access the **Tools** menu (Alt+T), and then select **Compatibility View settings**. The Compatibility View Settings window appears.

2. Enter ehr.com in the **Add this website:** box, and then click **Add**.
The Web site appears in the **Websites you've added to Compatibility View** box.

3. Click **Close**.
